Sintered Stone
Manufacture

—
**New
Collection**

SINISO

New Jincheng Group,known as the" Top 10 International Ceramic Company "

SINISO is one of its high-end sintered stone brands,established in 2020 also is the Drufting Unit of "Ceramic and Sintered Stone Standard" in China.

Since its establishment in 2020, SINISO has stood at the forefront of China's sintered stone home furnishing industry. Committed to providing customers with one-stop whole-house sintered stone solutions, creating a comprehensive one-stop sintered stone home furnishing ecosystem.

At SINISO, we transform natural inspiration into exceptional architectural solutions, offering premium slabs that bring elegance, durability, and artistry to modern living and commercial spaces.

Where innovation meets nature — and imagination shapes style.

SINISO

Authentic surfaces that capture the essence of natural stone and marble, crafted responsibly to remain timeless.

SUPERIOR MANUFACTURING

TECHNOLOGY LEADING THE TREND

SINISO has built a globally-integrated production ecosystem through strategic partnerships with world-leading machinery and raw material suppliers. Our facilities are equipped with internationally-sourced technology, including Italian SACMI CONTINUA+ presses, advanced digital printing systems, and precision cutting equipment, ensuring every slab meets rigorous global standards.

This advanced technological foundation supports a scalable and automated production operation. With 9 dedicated lines, over 100 automated units, we deliver an annual output exceeding USD 450 million — reflecting both our scale and our commitment to manufacturing excellence.

By uniting international expertise with intelligent production, SINISO creates more than premium surfaces — we provide integrated, design-forward solutions for global architectural and interior applications.

Our products set new benchmarks in performance, aesthetics, and functionality, supporting the creation of intelligent and sustainable built environments worldwide.

SURFACE

Satin | Gluetech | 3D Digital | Bush Hammered
Texture 1.0 | Texture 2.0 | Texture 3.0

SINISO surfaces are born from nature and perfected through innovation. With rapid, research-driven development, we consistently set the pace in global design and performance.

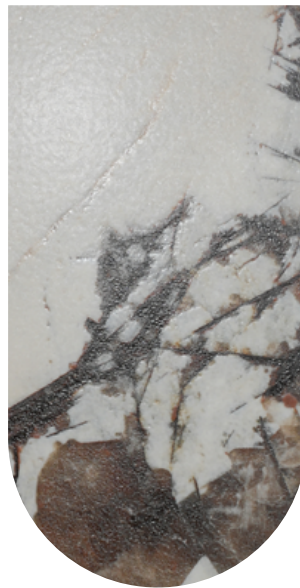

At the forefront of the industry, SINISO defines the future of sintered stone—swiftly, expertly, and without compromise.

SATIN

Special low-temperature glazing imparts a natural stone luster, faithfully replicating the essence of marble. With a subtle 7°-10° low-sheen finish, it eliminates reflection and delivers a naturally comfortable visual experience.

GLUETECH

Digital molds are overlaid with dry glue particles, resulting in a three-dimensional and distinct texture hierarchy. This breaks through the single-dimensional limitation and offers a dual tactile experience of gentle smoothness.

3D DIGITAL

Digital layering technology builds remarkable depth and realism. It accurately reproduces the authentic textures of stone, wood, and leather, achieving a premium sensory experience.

BUSH HAMMERED

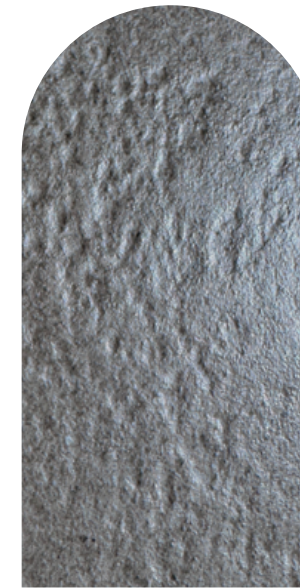

The bush-hammered finish creates a rustic, textured surface with a unique tactile feel and visual depth. It delivers both aesthetic character and easy maintenance, seamlessly blending traditional craftsmanship with modern innovation.

TEXTURE 1.0

Drawing inspiration from the natural iridescent textures, we have meticulously developed a soft matte surface plus high-gloss roller process to capture the flowing light and shadow on the slabs.

TEXTURE 2.0

A subtle low-gloss finish delivers a soft visual and natural diffuse reflection. Paired with textured dips, it creates a dimensional, authentic stone feel.

TEXTURE 3.0

Combined with the pressing technology of the "belt mold", the texture naturally undulates between light and shadow, creating a sense of hierarchy similar to that of natural stone.

SINISO

OUT FROM
WITHIN

SINISO integrates advanced digital modulation with continuous pressing systems to create sintered stone of exceptional integrity, where the authentic texture and color extend seamlessly through the entire depth of the slab, ensuring that the surface and body are truly one.

In contrast to other light-transmitting sintered stones that require a thickness of 3-6 mm to achieve light transmission, SINISO can achieve it at 12 mm. The translucent slab body with an 82° whiteness, combined with the intelligent light-moistening technology, endows the slab with a natural, jade-like, oily, and smooth texture.

Gluetech

1600x3200x12mm

HI PERFORMANCE SURFACES

High-precision digital molds capture the subtle contours of natural stone veins. Our unique layering technique, which fuses selected granules under immense pressure, creates a rich base texture.

A fine matte finish is then applied, imparting a soft, frosted feel that gracefully interacts with the underlying veins.

This contrasts harmoniously with the warm, smooth touch of the glossy textured areas. Together, they enhance the slab's three-dimensional depth, dynamic light play, and dual tactile experience, refining the essence of natural stone.

This is the art behind our high-end series: every vein tells a story of care, every inch of texture hides a stroke of mastery.

We recreates the textured relief of hand-tooled stone, delivering a rustic, tactile surface with authentic depth and character.

The subtle variations in the low-relief texture enhance both the visual and tactile experience, merging traditional craftsmanship with contemporary performance. The result is a durable, story-rich surface that brings a sense of history and timeless elegance to any space.

SINISO elevates surfaces through the fusion of profound inspiration and advanced technology. Each element of our name defines a pillar of our philosophy:

Superior in quality and performance.
Innovation in technology and design.
Nature as our eternal inspiration.
Imagine as the origin of every creation.
Style that defines and transcends.
Outstanding in every detail and finish.

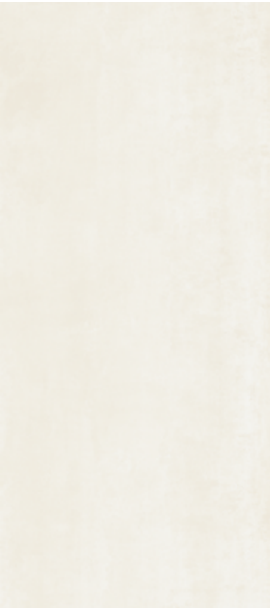

Together, these principles guide us in crafting premium sintered stone that brings enduring beauty and sophistication to spaces around the world.
